WILDLIFE BIOLOGIST/ECOLOGIST

About LGL Limited

Founded in 1971, LGL Limited is an employee-owned environmental research and consulting firm serving clients in Canada, the USA, and internationally. LGL's client base spans industry, government, Indigenous groups, public corporations, academia, and non-governmental organizations. Our body of work, including peer-reviewed scientific publications, demonstrates our scientific competence in the field and office, our ability to evaluate the environmental impacts of human activities, advance scientific knowledge, and satisfy or exceed the requirements of our clients and regulators.

About the Role

Reporting to a Senior Wildlife Biologist, the Wildlife Biologist/Ecologist will be part of our applied ecological research team with project work focusing on the ecology of terrestrial and wetland ecosystems, primarily in British Columbia and Alberta, with opportunities to work in other regions in Canada or the US. Work will include project planning, implementation, and delivery including data collection, entry, analysis, and reporting with the potential to contribute to peer-reviewed publications and/or presentations at relevant scientific conferences. This position comes with opportunities for career advancement and professional growth.

What You Will Be Doing

- Leading and supporting projects focused on addressing regulatory requirements or specific client needs related to wildlife and wildlife habitat, vegetation, wetlands, and general ecology.
- Conducting project work to provincially and federally accepted standards.
- Preparing and assisting with proposals and project reporting.
- Travelling for fieldwork with some projects requiring multiple trips away from home (multiple trips per year for up to 10–12 consecutive days at a time).

What You Will Bring

- Master of Science plus 3–5 years of professional experience or an equivalent combination of education and experience.
- RPBio (BC) or PBIOL (AB) certification (or eligibility to obtain this designation).
- Knowledge of the taxonomy and ecology of the terrestrial flora and/or terrestrial fauna of B.C. and Alberta.
- Excellent written and oral communication skills.
- Competence with field equipment and logistics.
- Experience as a consulting biologist is an asset.
- Positive attitude and flexibility to go with the flow.
- Willingness to work in harsh environments, including industrial sites.

What We Will Provide

- Competitive salary plus potential for profit sharing and ownership.
- Extended healthcare benefits and long-term disability.
- 3 weeks of paid vacation (initially).
- Contributions towards an RRSP and professional certifications.
- Career growth through mentorship, structured and informal professional development, and peer relationships.
- A safe and respectful workplace.

Additional Requirements

- Eligibility to work in Canada.
- Valid driver's license and clean driver's abstract.
